Dear Mr. Grumman:

Pursuant to our telephone conversation of November 3, 1986 concerning your request for analytical test data for three waste streams previously generated by Granite City Steel, I am enclosing a summary of analytical data for tar decanter sludge (USEPA #K087). I am not aware of any other analytical data specific to Granite City Steel for blast furnace flue dust or ammonia still lime sludge.

As I indicated to you by telephone, the steel industry submitted written comments to USEPA under the American Iron and Steel Institute letterhead in July, 1980 regarding blast furnace flue dust and in July of this year regarding tar decanter sludge (K087). These submittals contain some analytical data on these materials which may be of interest to you.

In addition, I have enclosed a photocopy at your request of a map depicting the location of the landfill site about which you inquired.

Very truly yours,

A handwritten signature in cursive script that reads 'Dan Hoffman' followed by a small flourish.

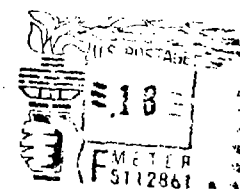

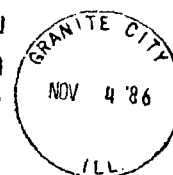

Dan Hoffman
